TRUTH

Grammar 101 (Pt 1) for the Hebrew "evening" in Gen 1

Stepping Stones for Bible Study

Examination of the Term "Evening" in **English &** Hebrew for Gen 1:5

Reviewing Simple Lessons Long Forgotten?!

How can a simple English word like "evening" pose such a confusing problem when linked to the proper commencement for the days of creation?

Could it be the Church Leaders, Pastors and Bible Workers have not been diligent enough in their search?

Have they been misled by traditions, ignorantly passing along what they have learned, to the nominal church member?

Can the nominal Bible Student really find out what the truth is of this "evening" controversy?

See how this problem can be solved with simple grammar skills.

Grammar Lessons For understanding the phrase from the last part of Gen 1:5 "...and the evening and the morning were the first day."

Does "evening" really mean "sunset"?

INTRODUCTION

- 1. In this study we are going to learn how to study the Scriptures with some basic study tools including:
- 2. Review of basic high-school grammar classes;
- 3. Use of dictionaries and lexicons.
- 4. The sample topic of study will be "day-start" from:
 - a. Gen 1: first day of creation (Grammar 101 Part 1)
 - b. Lev 23: Day of Atonement. (Grammar 101 Part 2)

Of High Importance:
Read more than
10 words
to discern context!

Thanking Our Friends in Africa

Many have studied the "day-start" issue and understand this truth for themselves.

But understanding and teaching to others so they can understand is another story.

Their explanations are still prompting questions such as this:

Do you have similar experiences?

Email from African "Dawn Day" Believer:

Hi Charlene: This question is from an 'even to even' person. How will you respond? [Their question follows:]

Hi everyone. I have a question. What does it mean that the knowledge of the Hebrew word "ereb," which meant "even or evening," which meant "afternoon" or "sunset" - is lost?

The Question is Always the Same

Since when does the day not begin with "evening" anymore?

Today we will attempt to sharpen our Bible study skills through finding the answer to the question on:

"When does Yahuah's day really begin?"

It's a Good Question! There is an Answer!

Working Between Two Languages

To learn French, one has to learn that "such and such a word in French" means "such and such a word in English."

We can't say, "no, I don't want to learn the true meaning of the French words, I think I'll just guess at the meaning, and hope I'm right ..." It works the same between English and Hebrew.

When it comes to understanding the "day-start" teaching, we can't say: "I'll just guess that the Hebrew word for "evening" means "afternoon" ... or sunset ... or "something else" ... whatever I want."

You'll likely be 100% wrong!

Again, you'll likely be 100% wrong!

Yet, this is exactly what has been happening with the word "evening." Many are still guessing!

There's Another Problem

- 1. Many of us have been taught that "evening" means "sunset" or "afternoon" or whatever.
- 2. Few of us have thought about challenging this point, because we really believed ...
- 3. What we were shown was true. We were taught this concept early.
- 4. Most of us have not been taught to question the meaning of such a simple word? Why?
- 5. Because we were taught our leaders, teachers and pastors knew the truth and taught us the truth about such a matter.

Which is right?

To satisfactorily answer the "evening" question we need to learn how to accept this controversial challenge by using better Bible study skills.

Responsibility of Teachers

- 1. Most of us just take for granted (and really believe) our:
 - Parents
 - Teachers
 - Pastors & Leaders
 - Know the truth about the "day-start."
- 2. The hardest part could be:
 - Realizing the true definition of the word "evening" is not "sunset."
 - We may question why our teachers did not investigate the Hebrew definition by simply looking it up in an exhaustive concordance.

What Could Be The Reason

Tradition is Taught as Truth?

Many believe:

- 1. The Jews have preserved the correct day for the weekly Sabbath. (Can you prove the true weekly Sabbath?)
- 2. The Jews have preserved Friday sunset as the commencement for all Sabbaths. (Today's challenge!)
- 3. The Jews hold many traditions. (How many can you name?)
- 4. As sheep, most of us have followed what the Jews hold as truth, because we believed they would know.

Have the sheep been following the wolf?

MALE TO A DESCRIPTION OF THE PARTY OF THE PA

What About Traditions?

Yahusha - Paul - Timothy

Yahusha: Matt 15:3, 9
Why do ye also transgress the commandment of Yahuah by your tradition?

9 But in vain they do worship me, teaching for doctrines the commandments of men.

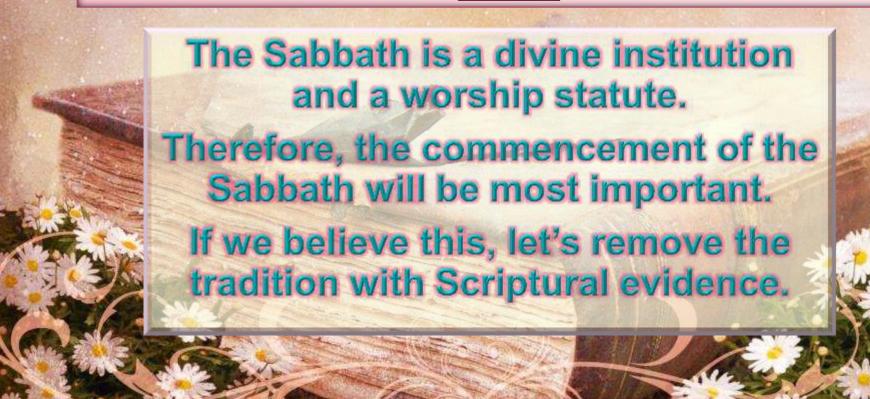

Paul: Col 2:8 Beware lest any man spoil you through philosophy and vain deceit, after the tradition of men, after the rudiments of the world, and not after Christ.

Timothy: 1 Tim 1:4 Neither give heed to fables ...

Do you believe these words?

"In the time of the end every divine institution is to be restored."

Reading? Study? Research?

- a. Start with prayer. (Jer 33:3)

 "Call to Me, and I will answer you, and show you great and mighty things, which you do not know." NKJV
- b. Bible <u>reading</u> is different than Bible <u>study</u>.
- c. Bible <u>study</u> is different than Bible <u>research</u>.
- d. In research, you need to know how to ask a lot of questions, and investigate a wide territory for what the Bible is saying from cover to cover.
- e. Despite "ignorant or deliberate" errors in the Word of Yahuah, the truth will present itself.

Isa 28:13 [hermeneutic] ... precept upon precept; line upon line ... here a little, and there a little ...

1. Getting Started With Content

Read the <u>content</u> of the study material carefully.

In Bible study this could be several verses or chapters before and after the verse or word in question.

Many people make a decision on the content by reading only 9-12 words of a complete passage.

2. Getting Started With Context

Learn to read in context.

Know exactly what every verse or chapter is talking about.

You might be surprised what you find?

1. Gen 1:1-5 (Day 1 of creation)
2. Lev 23:26-32 (Yom Kippur)

Two common mistakes are made to establish context in these 2 cases:

Gen 1: Only the last 10 words of verse 5 are read (out of a total of 89 words in verses 1-5).

Lev 23: Only the last 9 words of verse 32 are read (out of a total of 175 in verses 26-32).

3. Getting Started with Grammatical Terms

At least: know how to identify nouns, pronouns, adjectives, verbs, adverbs.

Knowing these are the absolute basics.

Our study today addresses only nouns.

Some words (like "day/daily") can be used as nouns, adjectives and/or adverbs.

In such cases it is important to know the category of the word in question. Why?

The context changes for words when they act as a noun, adjective or adverb.

4. Getting Started With Tenses

TENSES There are eight Tenses that we are going to learn for talking about science and technology cases. and they are divided into three major tenses. 1. Present Tenses 2. Past Tenses 3. Future Tenses

Know how to identify "tenses" ... like:

- 1) past tense
- 2) present tense
- 3) future tense

This is a difficult area for many students.

(Rev 13:1-5 is a good exercise to learn how to work with "tenses." Using the proper tense will bring forward the proper timeframe of the 42 month timeline.

The timeline will be misunderstood if the proper tense is not noted.)

5. Getting Started With Definitions

The Old Testament is translated from the original Hebrew language.

Sometimes the translators did NOT choose the best "word" or "phrase" to bring through the best meaning.

- Dan 7:25 "think to change times and laws"
 - The English word "times" does not reflect the true meaning in this verse referring to divinely set appointed statutes.

In both English and Hebrew, don't assume you know the variety of definitions, and which one is listed first.

In this study "day" and "evening" are two of those tricky words that have several definitions, all different.

Definitions for some of the simplest words must be checked.

A shelf full of dictionaries and concordances will be useful!

5a. Using Dictionaries

These
extra tools
do not
take the
place of
comparing
Scriptures!

Word meanings do change over eons of time (especially from the 1600s to the present day).

Get used to using:

- Strong's Exhaustive Concordance (definitions of Hebrew & Greek)
- Noah Webster's 1828 Dictionary (Meanings of words in the 1800s are closer to the Hebrew than today's meanings.)
- A variety of everyday dictionaries for comparisons
- 4. Lexicons and Commentaries

6. First Definitions in Dictionaries

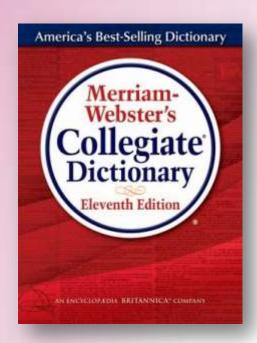

The very first definition of any word in the dictionary represents the way the word is used the most <u>in any language</u>.

- Everyday dictionary practice: will be on the word "star" to see how this works.
- Hebrew dictionary practice: will be on the words "day, night, evening and morning."

Learn how English and Hebrew Dictionaries compliment each other so the real meaning of the Hebrew can be understood.

Finding Definitions for the Word 'STAR'

Next, we will use the example of defining the word "star" to demonstrate how definitions are placed in a certain rank and order.

4a. Dictionary Practice: "Star"

- 1a: a natural luminous body visible in the sky especially at night
- a self-luminous gaseous spheroidal celestial body of great mass which produces energy by means of nuclear fusion reactions
- 2a (1): a planet or a configuration of the planets that is held in astrology to influence one's destiny or fortune — usually used in plural
 - (2): a waxing or waning fortune or fame <her star was rising>; obsolete: destiny
- 3a: a conventional figure with five or more points that represents a star; especially: asterisk [*]
 - b: an often star-shaped ornament or medal worn as a badge of honor, authority, or rank or as the insignia of an order
 - c: one of a group of conventional stars used to place something in a scale of value
- 4: something resembling a star <was hit on the head and saw stars>
- 5a: the principal member of a theatrical or operatic company who usually plays the chief roles
- b: a highly publicized theatrical or motion-picture performer
- c: an outstandingly talented performer <a track star>
- d: a person who is preeminent in a particular field

"STARS in the sky" take the first definition.

If you told someone "the stars were great last night" they will likely think you are describing the night sky – the first definition for "star."

Unless more information is given, the other person does not know you were talking about the Hollywood Stars and the rewards they receive.

More <u>content</u> would have to be given to understand the <u>context</u>.

Hebrew Dictionary Rules are the Same

Many people are having the same problem with the definition of the word "evening" as some may have with "star."

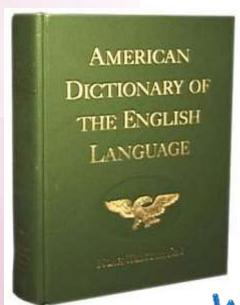

It's important to choose the correct definition that aligns with the Bible content & context.

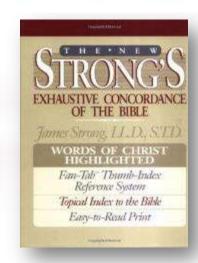

However:

Many assume they know the Hebrew definition without even checking to see if they are correct.

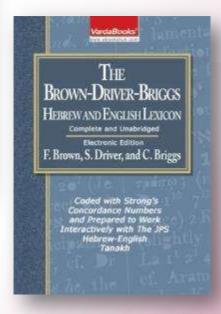

Over time, this is how "sunset" became an incorrect definition for "evening."

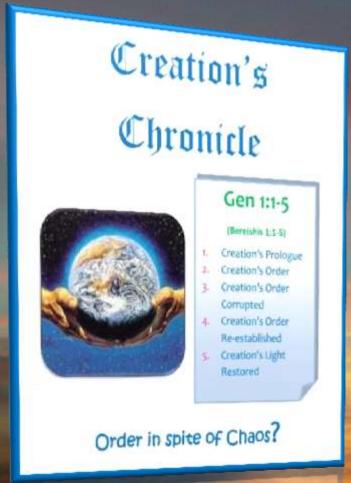

Applying Study Skills to Scripture Using the Hebrew Dictionary

We will examine "first" definitions first!

For the Full Study on Gen 1:1-5 (Day 1 of Creation) Creation's Chronicle

includes all content and context for the first 5 verses.

To solve the "evening" problem, this study scrutinizes four specific terms in Gen 1:5.

Today's Section will begin with an: Examination of only the 1st definitions for: DAY NIGHT EVENING MORNING

Gen 1:5 - A Very Special Verse

Genesis 1:5 is the first place where any of these four terms are found for the first time in the KJV.

And Yahuah called the light Day, and the darkness he called Night.

And the evening and the morning were the first day.

(First usage of "Day")

(First usage of "Night")

(First usage of "evening")

(First usage of "morning")

Let's begin our examination for <u>only</u> the <u>first</u> definition of these four terms in the:

Hebrew Dictionary

1st Def: Day <yown>

And Yahuah called the light Day

```
Strong's day H3117; yowm;
from an unused root meaning to be hot;
a day (as the warm hours),
whether literal (from sunrise to sunset ...[basically the 12 hours of light])
```

[or a more accurate explanation would be "from dawn to dusk."]

Note: In a short time you'll see how Mr. Strong's wording will be corrected by the Hebrew definitions of "evening" and "morning."

Brown-Driver-Brigg's Hebrew Lexicon day H3117 yowm - day.

a) day (as opposed to night) [basically the 12 hours of light]

Only 1 Def: Night <layil>

... and the darkness he called Night.

Strong's <u>night</u> H3915; layil;

from the same as H3883;

properly, a twist (away of the light),

i.e. night: KJV - <u>night</u> (<u>season</u>).

Not to be confused with vs 2 "darkness" <H2822>

<choshek>

Brown-Driver-Brigg's Hebrew Lexicon <u>night</u> H3915; layil – night

a) night (as opposed to day)

Hebrew word numbers often refer to several other numbers, including the primitive root.

st Def: Evening <ereb>

And the evening ...

Strong's evening H6153; ereb (eh'-reb); from H6150; dusk:

> H6150; `arab (aw-rab'); a primitive root [identical with H6148 through the idea of covering with a texture]; to grow dusky at sundown: KJV - <u>be darkened</u>, (toward) evening.

> > **H6148**; `arab (aw-rab');

a primitive root; to braid, i.e. intermix.

* Note: Mr. Strong's has no mention of "sunset" in these definitions ~ only dusk!

Brown-Driver-Brigg's Hebrew Lexicon evening **H6153**; `ereb – evening ...

Many times BDB lacks in their definitions! 34

Only 1 Def: Morning <boqer>

... and the morning were the first day.

Strong's morning H1242; boqer;

from H1239; properly, dawn (as the break of day).

H1239; baqar; a primitive root;

properly, to plough, or (generally) break forth.

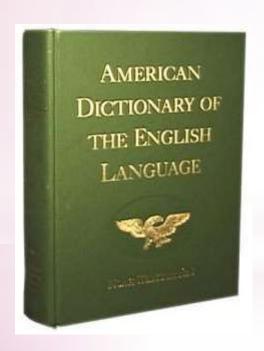

*Note: Mr. Strong's has no mention of "sunrise" in these definitions ~ only dawn! (Review slide 32 again!)

Brown-Driver-Brigg's Hebrew Lexicon morning H1242; boqer – morning, the break of day

- a) morning
 - 1) used of end of night
 - 2) used of coming of daylight
 - 3) used of coming of sunrise
 - 4) used of beginning of day

Occasionally BDB has many definitions!

Confirming the Meanings of "dusk" & "dawn"

Just to be sure the 1st definition of "evening" & "morning" in Hebrew has not changed in translation to English, we will check the Webster's 1828 Dictionary for comparison.

The 1828 dictionary gives the most accurate definition of English words as they connect to the Hebrew definitions.

Only the "noun" definitions will be considered. 36

Dusk, noun [Webster's 1828]

A tending to darkness; incipient or imperfect obscurity; a middle degree between light and darkness; [it goes on to say]

twilight;

as the dusk of the evening.

Tendency to a black color; darkness of color.

[eg:] Whose dusk set off the whiteness of the skin.

Dawn, noun [Webster's 1828]

The break of day;

The first appearance of light, in the morning.

They arose about the dawn of the day. Josh 6:15.

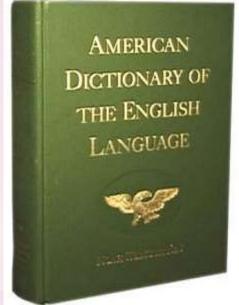

The word may express the whole time from the first appearance of light to sunrise.

DAWNING, noun.

The first appearance of light in the morning.

"Dawn" is NOT "sunrise!"

Determining the Meaning of "twilight"

Twilight was used by Webster to define "dusk <ereb>."

Surprise! Many people do not know what twilight is?

Do you?!

TWILIGHT, noun.

The faint light which is reflected upon the earth after sunSET and before sunRISE; crepuscular light.

In latitudes remote from the equator, the twilight is of much longer duration than at, and near, the equator.

How does "crepuscular" connect to "twilight" in nature?

- This double ereb is also witnessed by - and declared from - Yahuah's creation, just like He promised.
- Crepuscular animals are a natural witness to the <u>two</u> "ereb/mixture time slots" for every 24 hour day.
- They are active primarily during the TWILIGHT – like the beavers.
- This is distinguished from animals active during the daylight hours (diurnal behavior) or active during the hours of darkness (nocturnal behavior).

Amazing Fact!

The beavers are a witness to which day is Shabbat (at the following link):

https://www.youtube.com/watch?v=49T5unQElbY&t=4s

(You-tube: Beavers that rest on Saturday.)

How does "crepuscular" light connect to "twilight" for Yahuah's count?

How does Strong's define "twilight"?

- The plural word erebs has the same mis-appropriation of usage, like so many other words from the Hebrew.
- Somehow ereb and evening have become mutually synonymous.
 (eg: Some believe that ALL "mo`edim" are "appointed feasts" or ALL "erebs" are dusk twilights.)
- However, these crepuscular events (twilights) are divinely designed as Yahuah's "kingpin" for a "buffer zone" so His children know when the new day begins without looking to the sun!

Twilight <nesheph>

Strong's twilight H5399; nesheph; from H5398; properly, a breeze, i.e. (by implication) dusk [1st definition] (when the evening breeze prevails):

KJV - dark, dawning of the day [2nd definition] (morning), night, twilight.

For comparison & further information note the vague definition from:

Brown-Driver-Brigg's Hebrew Lexicon twilight H5398; nashaph –

(Qal) to blow [Qal = the most common literal message for proper interpretation.]

DUSK is the 1st definition; DAWN is the 2nd!

Twilight 1st Note

DUSK is the 1st definition; DAWN is the 2nd! There are 14 "twilight" references in the Tanach using H5398 & H5399.

H5398 twilight as the root word is first used in **Exo 15:10** for the Red Sea crossing. This event originated with the **evening** winds that parted the water allowing the people to cross over during the following night hours.

H5399 twilight is first used in 1 Sam 30:17 (David in battle).

Question [& homework] for H5399 twilight: Will 1 Sam 30:17 take the definition of "dusk" or "dawn" for the word "twilight"?

And David smote them from the <u>twilight</u> even [H5704; <ad>] unto the evening [H6153; <ereb>] of the next day: and there escaped not a man of them, save four hundred young men ...

In the other 12 references for "twilight/nesheph" – the <u>content</u> and <u>context</u> would have to be carefully examined to determine exactly which twilight is being referred to – dawn, or dusk?

Twilight 2nd Note

- a. Remember, both the "dusk twilight" and the "dawn twilight" contain "a mixture of light and night."
- b. The first definition for the word "day" is the 12 hours of Day Season that has the presence of "light."
- c. Therefore, both twilights belong to the Day Season!

Twilight 3rd Note

- a. "Night" is the absence of any [day] "light" that is naturally seen in the "day" sky – specifically, the absence of "sun light."
- b. By default neither twilight can belong to, or be part of, the Night Season!

Each Day Season Contains Light from the Sun

Twilights belong to the Day Season.

Night Season Has no Direct Light from the Sun

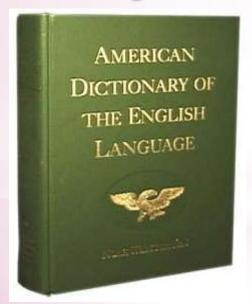

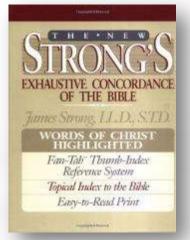

Twilights never belong to the Night Season.

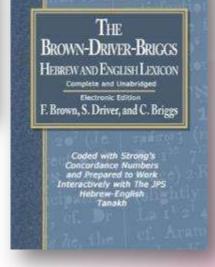

Question to ponder:
Do the northern lights
belong to the
Day Season or
the Night Season?

Applying the 1st Definitions of Hebrew to: Day Night Evening Morning

Remember: The 1st usage of a word most often takes the 1st definition.

Let's use this application on Gen 1:5.

Listing the 1st Definitions Day <yowm> H3117

And Yahuah called the light Day,

- * meaning to be hot; (as the warm hours),
- * (from sunrise to sunset ...) [should be: dawn to dusk].

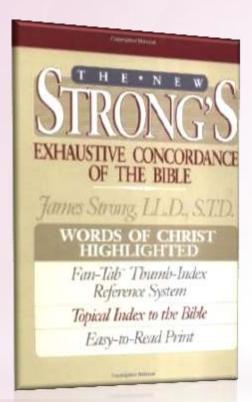

Note: Strong's would have been more accurate using the terms ...

- a) "dawn" (not sunrise) b) "dusk" (not sunset)

R W

<yowm> as the Day Season has priority.

Question:

Where do you suppose Mr Strong picked up the definition of "sunrise & sunset" in place of "dawn & dusk"?

Night < layil > H3915

... and the darkness he called Night.

* a twist (away of the light), night (season).

<layil> is the
only term in
Gen 1:5 that
belongs to the
Night Season.

* Not to be confused with vs 2 "darkness" <H2822 choshek>.

Evening <ereb> H6153

And the evening ...

- *dusk; to grow dusky;
- *be darkened,
- *a primitive root; to braid, intermix

<ereb> has a
 mixture of
"light" and "night."
Therefore <ereb>
 belongs to the
 Day Season.

R E V I E W

Morning <boqer> H1242

... and the morning were the first day.

* properly, dawn (as the break of day);

a primitive root; (generally) break forth.

<boqer> also has
 a mixture of
"light" and "night."
Therefore <boqer>
 belongs to
 the Day Season.

Assembling Gen 1:5 all Together Day Night Evening Morning

And Yahuah called the light <u>Day</u>, as the warm hours for the <u>Day Season</u> [including dawn and dusk],

and the darkness he called the Night Season or a twist (away of the light);

[Then Yahuah gives more information for the Day Season saying:]

*

*And the evening dusk [came to be after the Day Season];

*[then] the morning ploughs forth; and dawn breaks out the new day; [as part of the Day Season twilight];

*

were *and the morning and evening belong to the Day Season.

Most of us have been taught an Incorrect Understanding For

Evening and Morning

*"... And the <u>evening</u>, ** and the <u>morning</u>

**were ** the first day."

These phrases have traditionally been taught to mean that the new <yowm> day/cycle begins in the evening.

This is simply not true!

1st usage of a word in the Scriptures, most often takes the 1st definition.

Light/Day

- a. 1st used in Gen 1:5a.
- b. 1st definition is the "warm hours" or 12 hours of the day.
- c. Light is called DAY.
- d. 2nd use of DAY in
 Gen 1:5b aligns with the two twilights, linking them to the Day Season.

Evening/Morning

- a. 1st usage in Gen 1:5b,
 after Day Season has been determined.
- b. 1st definition is correct as "dusk" and "dawn."
- c. Both terms are twilights.
- d. Evening and Morning both belong to the Day Season.

Let's chart this information.

#1 Large Components of the Day

Gen 1:5a

1st: there are 2 major divisions to divide the 24 hour cycle in half.

> 12 hrs. Day 12 hrs. Night

1. Light is called DAY

2. Darkness is called NIGHT

Notice: Everything about creation week started here with Day-Light.

#2 Small Components of the Day

The twilight components are small slivers of transition between the light and night.

Evening twilight was placed 12 hrs.

before the Morning twilight.

The Gen 1:5 "order" is correct!

#3 Proper Order of the Components

4th Morning twilight follows [ends the 1st day & begins the 2nd day] Light came 1st (called: DAY)

3rd Night follows evening 2nd Evening twilight follows

In modern terms

Gen 1:5b would read this way:

And the dusk twilight, and the dawn twilight

belong to the [day] — the hot part

of the 12 hour Day Season.

#4 Night as Compared to Twilight

4th Morning twilight Light came 1st (called: DAY)

2nd Evening twilight

3rd Night follows evening

Night is the absence of LIGHT.

Twilight contains LIGHT.

That's why twilights are reckoned as part of the "day" or DAY Season!

Here's a True Definition

Any portion of the 24 hour cycle that has a "twilight mixture" belongs only to the Day Season – NOT the Night Season. (Therefore, the evening has nothing to do with how a day begins.)

The two "day season" twilights are before sunRISE & after sunSET.

Neither twilight belongs to the Night Season.

But the morning is even more special.

The morning ends the former 24 hour cycle, and begins the new 24 hour cycle at the moment of daybreak.

In Gen 1:5 morning ends Day One and begins Day Two.

Something to Think About!

The phrase: "and the evening and the morning were the first day" ...

... is NOT a definition of when the day begins!

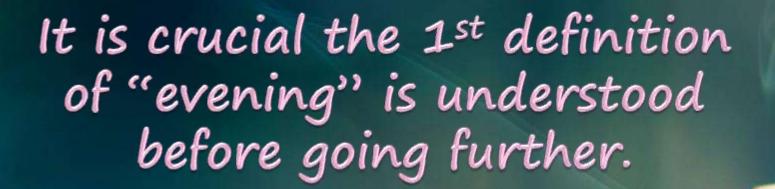

Gen 1:5b is confirming "where" the "evening" & "morning" twilights belong!

They belong ONLY to the Day Season!

Why Dusk Twilight Cannot Begin Any New Day

- 1. Dusk twilight is a mixture of light/night.
- Light must be present <u>first</u> before a dusk/twilight can follow.
- 3. Light is mentioned 3 times in Gen 1 before evening is mentioned the first time.
- 4. Keep in mind, it is impossible for the dusk twilight (evening) to follow the Night Season!

Remember: the twilights have been purposely placed as a safeguard to "not look to the sun" for day-start.

Why?
Because we are now going to examine "other" definitions for "evening" that are very different.

Evening: 2nd Definition

The 2nd definition is: "day"

At this point there should be a huge question as to why "day" is ever listed as a definition!

WHY

Because "ereb" is defined as a "mixing of light and night." There is no "mixing" during the Day Season! This will be addressed in a later study through the term "between the evenings."

Evening: 3rd & 4th Definitions

[The 3rd definition] <u>even</u> (-ing, <u>tide</u>) ['<u>eventide</u>' - in old English this is another term that means dusk "twilight." This twilight is not to be confused with DAWN - morning twilight.]

[The 4th definition] night.

For ereb, and its 4th definition of night, the Scriptures would have to contain the context of the "evening" giving way to the Night Season as seen in Lev 6:20.

Note: Sunset is NOT one of the definitions for <ereb>.

Sunset is a point of time that ushers in <ereb>.

In Gen 1:5 "evening" <ereb> rightly claims the 1st definition as dusk - the mixing of light and night.

Evening <ereb> can only claim the 2nd definition of "day" [or no mixing] ...

WHEN there is a "qualifier"!

What does it mean to have a "qualifier"?

Several examples will be considered in the study on "between the evenings."

4) Gospels: Yahusha's Passion

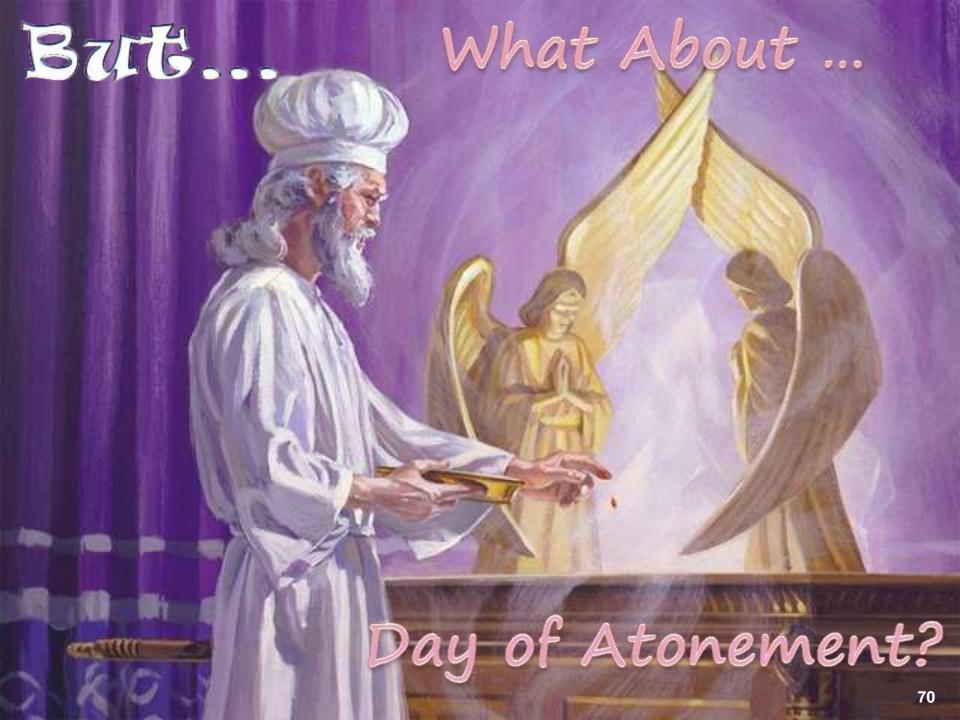

The 1st day
of creation
began with
LIGHT.

This describes the 1st definition of <yown> as the 12 hour Day Season.

The 2nd
definition
of day <yowm>
describes the 24
hour cycle from
"dawn to dawn."

Yahuah's days do not begin at "evening" or "sunset."

Grammar 101 (Part 2) will examine ...

... the context of Lev 23:26-32 for the:

• 10th day of the 7th month
• 9th day of the 7th month

We will determine what the last words of Lev 23:32 really mean:

One last question: Will Leviticus 23:32 declare that Day of Atonement (and every other Sabbath day) really does begin in the evening - rather than at down twilight?

The Next Study: The Hebrew Evening

The word "evening" <ereb>
is the cornerstone for the
whole calendar study.

There must be clarity here.

Enjoy these beautiful mornings that usher in Yahuah's original Covenant Day!

Send your questions/comments to:

<u>Charlene@studythecalendar.com</u>
