

Killer Bees, or Honey Bees?

Introductory Study from

1 Samuel 14

(Dawn Day)

Why another "dawn" day study?

The truth of the "dawn day" commencement was lost a long time ago - about the time the exiles returned from Babylon changing it to the "sunset/evening" commencement. Rome made changes to "midnight." History books speak of day commencements as being at 6 PM every day. Over recent years some claim Yahuah's day begins at sunrise or noon. In the last 10 years this truth is being restored according to creation and Torah, so you can experience the ...

Sweetness of Dawn!

Every Single Day of the Week!

This Scripture testimony
has been preserved for us
since 365 years
after Moses.

At that time King Saul was
leading Israel according to
all the Torah Commands.

**What does that have
to do with
a honey bee?**

Commitment!

The 3 main characters are King Saul, his son Jonathan and one armour bearer.

Just as this honey bee is committed and “all in” what does that have to do with a study on day-start?

Yonathan's life was at stake as soon as he tasted some honey which was strictly against a **COMMAND** of King Saul that he knew nothing about!

What does that have to do with any day-start?

This COMMAND
of King Saul was given
in the Light Season.

The violation was discovered
“after the sun had set.”

**Sunset
Theory
declares ...**

**After the sun has set,
a new day begins! ??**

**If Sunset Theory is correct,
then by default, this story takes place
over the period of **two days**!**

However, the
Premier Witness of
1 Samuel 14 claims
there is only ONE
DAY involved.

1 Sam 14:1 **And it came to be**
ONE DAY that Yonathan son
of Sha'ul said to the young man who bore his
armour, "Come, and let us go over to the
outpost of the Philistines which is on the
other side." But he did not inform his father.

PLUS, there are 6 more confirmations that the "day" is
singular, not including a new day after the sunset!

Dawn

Yonathan and
his armour bearer
exterminated 20 men on
this early morning!
The battle continued
through the Light Season.

**Samuel confirms all of these
events are found in one day!**

Yonathan
ate honey late in
the Light Season.

Saul's lot fell on
Yonathan
after the sun had set.

Sunset

Saul's command:

Do not eat food until evening!

Was this the next "day"?

**How will sunset theory keep all of these
events within one 24 hour cycle?**

The question: Is this testimony in 1 Samuel based upon the Torah statutes?

???

Do we
need to “bee”
Torah Observant?
