# THE TEQUEAH UNVEILED

520 260

#### WHAT ON EARTH IS A TEQUEAH?

- The Tequian is actually a <u>Celestial Event</u> designed by <u>Yahuah</u> as <u>a sign</u> for determining time.
- The Tequian does not rely solely on a single orb but is a combination of multiple identities in the vast shamayim (heavens).

#### A TEQUEAH IS KNOWN IN ENGLISH AS AN - EQUINOX.

- There are 2 Tequfah (equinoxes) within one year. The first event is the spring Tequfah which occurs on either March 19, 20 or 21 (Gregorian).
  [The dates being used here are calculated from the Universal Coordinated Time (UTC) zone. These dates need to be adjusted according to the location of where one lives on this earth. More about UTC later in this presentation.]
- The most common date is the 20<sup>th</sup>, then the 21<sup>st</sup> and more rarely, the 19<sup>th</sup> of March (Gregorian).
- The autumn Tequfah occurs on and around September 23 (Gregorian).
- The Tequfah is very commonly mistaken as the Equilux.

- Let's get to the Equilux and get it out of our way.
- The Equilux is <u>incorrectly</u> defined as the "cycle" when Light and Night Seasons are <u>evenly distributed</u> within one 24 hour period 12 hours of light and 12 hours of darkness.
- One big problem is man does not consider the 2 twilights which contain Light and are integral with the Light Season according to our Creator.
- A very serious problem with this event utilized for determining time is that it has very <u>inconsistent characteristics</u>, causing it to be <u>exceedingly inaccurate</u>.
   (See the study on the <u>Equi-LUX</u> <u>Deception</u>.)
- When light travels through the atmosphere the refraction is very similar to when light travels through a prism.
  - The atmospheric humidity can cause the light traveling through it to be inconsistent and bend into unexpected directions.

 This inconsistency can cause the Equilux to be 4 days out of synch around the world.

For more information please ask for the article written from Pine River Observatory under the heading - The Tequfah Controversy.

- Yahuah is not an Elohim of inconsistency nor does He "shoot from the hip" and hope all goes well. Quite the contrary, Yahuah is actually extremely accurate in everything He does.
- An equilux <u>cannot promote a <u>UNITED</u> <u>bride</u> who will worship <u>Yahuah</u> on His Set-Apart Appointments upon which He promised specifically to <u>dwell</u> with <u>us</u>.
  </u>

In Isaiah 14 we learn of the <u>adversary's intention</u> of <u>usurping our worship</u> intended for Yahuah - for himself.

- Isa 14:12 How you have fallen from the heavens, O Hĕlĕl, son of the morning! You have been cut down to the ground, you who laid low the gentiles!
- Isa 14:13 For you have said in your heart, "Let <u>me</u> go up to the heavens, let <u>me</u> raise my throne above the stars of Ěl, and <u>let me sit in the mount of meeting</u> [The Mo-edim Feasts & Festivals] on the sides of the north;
- Isa 14:14 let **me** go up above the heights of the clouds, let **me** be like the Most High."

Ha Satan is here declaring -

MOUNT OF MEETING -

YAHUAH'S MO-EDIM!

Right here we read of the adversary's intent to <u>USURP</u> CONTROL of Yahuah's Mo-edim (the mount of meeting).

What more efficient way to usurp the **Mo-edim** from **Yahuah** than to convince and deceive mankind into observing **Yahuah's Feasts** on a

**COUNTERFEIT** schedule?

#### THE **ADVERSARY'S COUNTERFEIT** WORSHIP CALENDAR – REFLECTIONS OF HIS GARDEN OF EDEN MESSAGE!

The Father of Deception tolerates – **IF WE MUST OBSERVE THE MO-EDIM** – **AS LONG AS WE OBSERVE THEM ON <b>HIS COUNTERFEIT CALENDARS**.

These counterfeit calendars facilitate the Adversary in **USURPING** our righteous intention of worshipping our Creator. Counterfeit calendars **REDIRECT** our heartfelt worship to the **Father of Deceptions**!

Ha Satan has re-designed and declared the lunation of the moon **peripheries** to be only fractionally off from **Yahuah's shaneh** months! They are only fractionally out of synch with the designated timeframes created and imposed by **Yahuah!** The word – **camaflouge** – comes to mind here.

# Again -

The adversary has attempted everything in his arsenal to deceive **Yahuah's** people from paying allegiance to their Creator and Redeemer.

What we do with this information will determine our future!

So it becomes **QUITE IMPORTANT** to know what the Scriptures declare as the authentic beginning of **Yahuah's** Worship Year — the Feasts and Festivals as written in Leviticus 23.

#### NEXT, A CLOSER LOOK AT -

# TEQUEARI

#### WHAT IS THE ACTUAL - TEQUEAH?

#### Wikipedia

An **equinox** [tequfah] is an astronomical event in which the <u>plane</u> of Earth's <u>equator</u> passes through the center of the Sun, which occurs twice each year, around 20 March and 23 September. [Universal Coordinated Time (UTC)]

On an equinox, day and night are of <u>approximately</u> equal duration <u>ALL over the planet</u>. <u>They are <u>not</u> exactly equal, however, due to the angular size of the sun and <u>atmospheric refraction</u>.</u>

To avoid this <u>ambiguity</u>, the word *equilux* is sometimes used to mean a day in which the durations of light and darkness are <u>fairly</u> equal.

#### ANOTHER QUOTE FOR – TEQUEAH!

- More about the spring equinox: The spring equinox and the fall equinox, or autumnal equinox, are the only days of the year when the sun rises from due east and sets at due west.
- A number of factors can influence the length of daylight experienced in any given area, and the precisely equal days and nights actually fall slightly ahead of the spring **equinox**, and just after the fall **equinox**. Two people standing at equal distance from the equator would experience days and nights of the same length, however.

- At tequfah, the sun rises due east and follows a perfect arc setting due west, measurable on a sun dial, over the length of the equator within one 24 hour cycle.
- Any <u>deviation</u> from this perfect arc, is measurable on a sun dial by the <u>visibility of a</u>
   shadow \* on a properly installed sun dial (note James 1:17 next slide).
- A tequfah (equinox) consists of basically 4 identities.
  - 1. Earth
  - 2. Light • •
  - **3.** Sun
  - 4. Mazzaroth Stars

In Him was Hai [Life], and the Hai was the **Light** of men. John 1:4

This combination of celestial identities permits a visible sign necessary for man to determine time as designated in the Scriptures of Yahuah.

Please note this combination of identities, approved and designed by Yahuah, prevents man from identifying <u>one</u> celestial creation of Yahuah for worship purposes. Yahuah has purposely built in a preventative maintenance situation, - a combination of celestial identities - <u>TO PREVENT SUN WORSHIP</u>. <u>Let us Praise Yahuah</u> for His infinite wisdom –

Noting the asterisk on the last slide about the shadow ...

North

Latitude

15

There are numerous types of sundials and sun clocks. (We will not go into details in this study.)

**Tequfah Conditions:** The sun rises due east and sets due west without deviation.

During the **tequfah sign** event, on one style of sun dial, there will be **NO SHADOW** on the face of the sun dial during a few minutes while the sun is directly overhead.

On another type of sun dial, with the same celestial conditions, the shadow will demarcate a perfectly straight line during the tequfah sign. This type will expose a curved shadow line deviating from the perfectly straight line before and after the tequfah sign.

Now let's look at Ya'aqob (James) from the Messianic Testament.

James 1:16 **Do not go astray,** my beloved brothers.

James 1:17 Every good gift and every perfect gift is from above, coming down from the *Father of lights*, with whom there is no change,

#### NOR SHADOW OF TURNING.

East

Shadow Arc

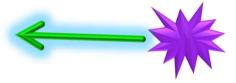

Tegufah Sign - Gen 1:14

#### Shadow Arc

This verse is a clear reference to determining the **tequfah sign** (straight line) by the design of measuring a **deviation of the shadow** from a <u>straight line format</u>.

Lets look closer at the word – "turning" – G5157 – trope.

#### Brown Driver Brigg's Lexicon "turning" G5157 trope

1 a turning 1(b) of the heavenly bodies

Thayer's Lexicon a turning of the heavenly bodies

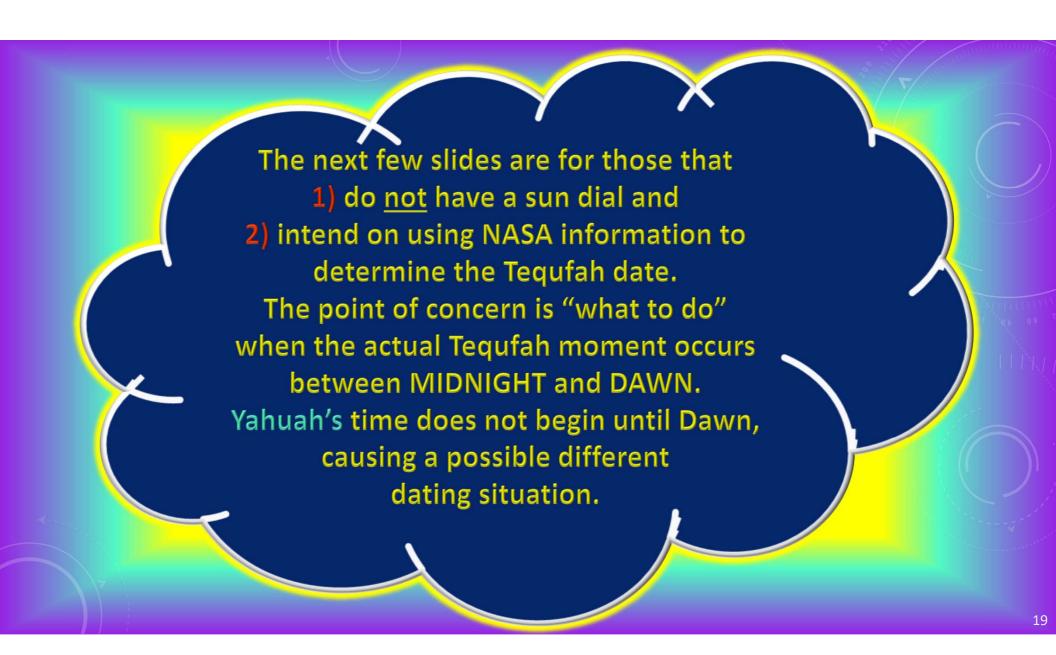

The heavenly bodies that Ya'aqob (James) is identifying are the Mazzaroth Stars, the orbs of the Sun and the Earth. Ya'aqob (James) is recognizing and warning us of <u>THE CHANGE</u> from the Mazzaroth based calendar of former times, to the Lunar/Solar Calendar <u>CHANGE</u> which slowly crept into the Temple worship system. The system of worship in the 2<sup>nd</sup> Temple era, the Hasmonean/Maccabean era, saw a change of the Mazzaroth based calendar worship practices evolving to a Lunar based, Lunar/Solar Calendar from Babylon.

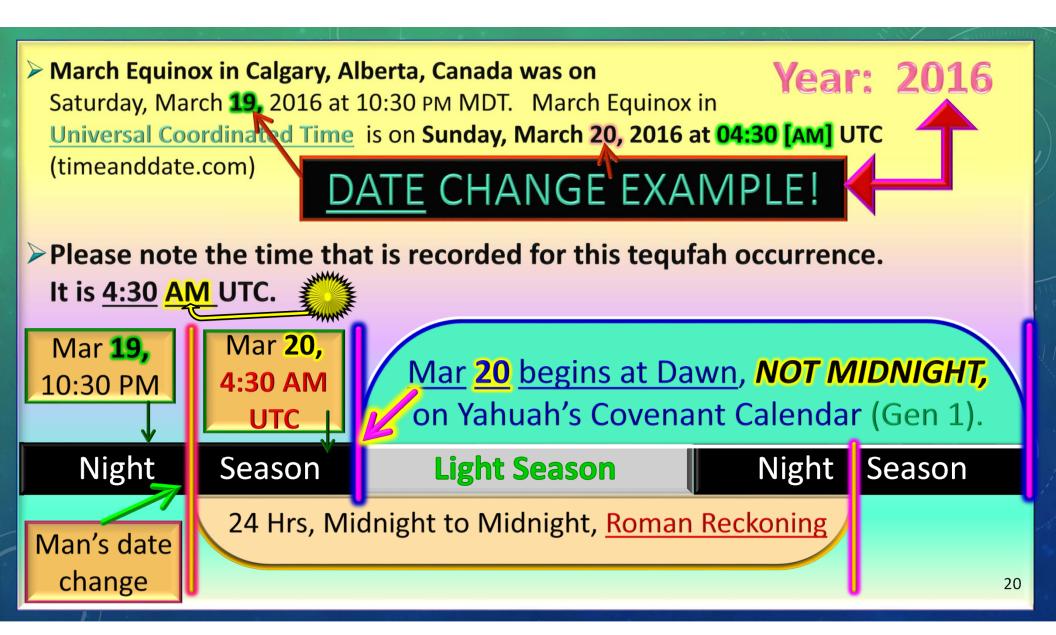

Ya'aqob (James) is advising us to <u>BE AWARE</u> that Yahuah <u>does not change</u>. Yahuah's system of worship always was and always will be based upon the Mazzaroth where the tequfah facilitates the exchange of years. This system produces a shadow which can be accurately traced to expose a perfectly straight or in contrast, a disappearing shadow sign (Gen1:14)!

Ya'aqob is **EXONERATING** the Covenant Calendar of the Old Testament worship system seen thoroughly revealed in the flood account of Noah!

# Comparison of Equinox Timing for 2016 and 2018

Equinox can occur at any time of the Day Season or Night Season.

#### Same Graphic! (2016)

When the Tequfah moment is declared between MIDNIGHT and **DAWN**, then a deliberate date calculation adjustment is necessary. Your time zone location on this earth is important!

Mar 19, 10:30 PM Night

Man's date change

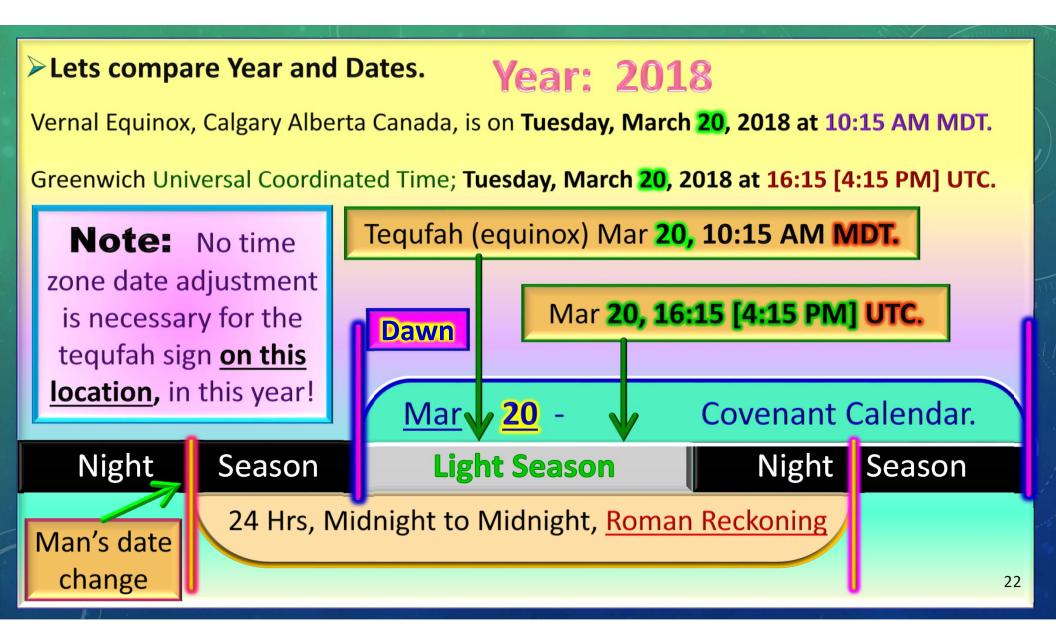

Mar **20**, 4:30 AM UTC Season

**Light Season** 

Mar 20 begins at Dawn, NOT MIDNIGHT, on Yahuah's Covenant Calendar (Gen 1).

Night | Season

24 Hrs, Midnight to Midnight, Roman Reckoning

# WHERE IS — TEQUEAH — LOCATED - IN THE SCRIPTURES?

- Ex 34:22 And perform the Festival of Weeks for yourself, of the first-fruits of wheat harvest, and the Festival of Ingathering at the *turn of the year* [תקופה]. tequfah].
- 1 Sam 1:20 And it came to be at the *turn of days* [הקופה] tequfah], that Ḥannah conceived and bore a son, and called his name Shemu'ĕl, "Because I have asked יהוה [Yahuah] for him."

- 2 Ch 24:23 And it came to be, at the *turn of the year* [תקופה tequfah], that the army of Aram came up against him. And they came into Yehudah and Yerushalayim, and destroyed all the rulers of the people from among the people, and sent all their spoil to the sovereign of Darmeseq.
- Ps 19:6 Its rising is from one end of the heavens, And its circuit [תקופה] tequfah], to the other end; And naught is hidden from its heat.

We have just read the four places where the term – **tequfah** – is used in the Scriptures. Let's address the first text noted.

Ex 34:22 And perform the Festival of Weeks for yourself, of the first-fruits of wheat harvest, and the Festival of Ingathering at the turn of the year [תקופה] – tequfah].

This **tequfah** (turn of the year) is marking the 2<sup>nd</sup> **tequfah** of the year. When? Around Sept 22 (Gregorian) which needs to be adjusted according to one's location on this earth. The Fall Festivals are centered around (but not calculated by) the autumn **tequfah** (equinox) when the year begins to have less Light Season and more Night Season. This is the end of the agricultural season. Hence the Feast of the Harvest.

Let's look again at the 2018 Covenant Calendar, on the first of the 7th month!

Sept 17 (Gregorian). The Festival of Trumpets occurs - HERALDING (Trumpeting) the arrival of the autumnal Tequian on (Sept 22).

Trumpets also informs us of, the <u>Day of Atonement</u> on Sept <u>26</u> (Gregorian), <u>and</u> following that, the Feast of Tabernacles on Oct 1 (not shown)!

Feast of Trumpets	1 <sup>st</sup> Cycle Sun	2 <sup>nd</sup> Cycle Mon	3 <sup>rd</sup> Cycle Tues	4 <sup>th</sup> Cycle Wed	5 <sup>th</sup> Cycle Thur	6 <sup>th</sup> Cycle Fri	7 <sup>th</sup> Cycle Shabbath	
heralding							1	
the coming  Tequfah.	2	3	4	5	6	7	8	Togutab
	9	10	11	12	13	14	15	
	16	17	18	19	20	21	22	Solemn
	23/	24	25	26	27	28	29	Assembly Sabbath for Day
25	30							of Atonement

Now let's look at the  $2^{nd}$  verse seen with - tequfah - written therein.

1 Sam 1:20 And it came to be at the *turn of days* [תקופה] – tequfah], that Ḥannah conceived and bore a son, and called his name Shemu'ĕl, "Because I have asked יהוה [Yahuah] for him."

We understand this to be the time frame for Passover, note verse 21 – "yearly slaughtering." Hannah, in extreme agony had been praying for a child (1 Sam 1:7-11). That prayer was heard and granted approval by Yahuah. We then learn that at the event of the tequfah, Hannah produced the child known to us as Samuel.

**Yahuah** incorporated the Mazzaroth based Mo-edim in the birth timing of **Yitshaq** (Isaac, Gen 17:21/18:14/21:2). This is another example of **MANY** Set-Apart Mo-ed markers by which **Yahuah** guided the nation of Yisra'el.

Elqanah knew Hannah and 9 months later at the **start of the year (tequfah)**, she was with child (Samuel), and preparing to give birth just before Passover. Coincidence? Not a chance! (Pun intended!) ©

Investigating more verses on – tequfah!

2 Ch 24:23 And it came to be, at the turn of the year [תקופה] –
tequfah], that the army of Aram came up against him. And
they came into Yehudah and Yerushalayim, and destroyed
all the rulers of the people from among the people, and
sent all their spoil to the sovereign of Darmeseq.

This text is speaking about the spring **tequfah** and will be further verified when we look at another word which helps verify these concepts.

Ps 19:6
Its rising is from one end of the heavens, And its *circuit*[תקופה – tequfah], to the other end; And naught is hidden from its heat.

# VERIFICATION OF THE CELESTIAL COMBINATION WHICH USHERS IN THE TEQUEAH

- Ps 19:6 Its rising [the sun] is from one end of the heavens [the starting point within the stars of the Mazzaroth], And its [yearly] circuit [הקופה]. tequfah], to the other end; And naught is hidden from its heat.
- WOW! This is one loaded text! From one point in the Mazzaroth 365+ cycles later, returning to the same basic point within the Mazzaroth!

This point demands more comment, but for this study it will suffice.

The Mazzaroth is the "one unit" of twelve constellations as mentioned in Job 9:9/38:31-33/41:1 (leviathon is the largest constellation.)

What celestial <u>combination of identities</u> is given precedence over the orb of the sun? Let's read –

- Ps 19:1 The heavens [includes the Mazzaroth] are proclaiming the esteem of Ěl; And the expanse is declaring the work of His hand.
- Ps 19:2 Day to day pours forth speech, <u>And night to night reveals knowledge</u> [within each Mazzaroth constellation].
- Ps 19:3 There is no speech, and there are no words, Their voice is not heard.
- Ps 19:4 Their line has gone out through all the earth, <u>And their words to the end of the world</u>. In them [the Mazzaroth] He set up a tent for the sun.

Although the sun is highly respected, it is subordinate to the Mazzaroth. What is the Mazzaroth?

The Mazzaroth is nothing less than the 2<sup>nd</sup> Witness to the Scriptures which the Dragon cannot touch nor tamper with his evil intentions.

The Mazzaroth consists of the **TWELVE** Constellations which relates the basic **visual story** of **Salvation** written in the stars, from Genesis 1 to Revelation 22:21. See Rev 12:1!

## BACK TO THE TEQUEAH ©

When the sun has achieved a full circuit — 365+ cycles within the Mazzaroth, the tequfah (spring equinox) once again occurs, resetting the start of Yahuah's Qodesh (Set-Apart) Feast and Festival – Covenant Calendar.

How do we know which tequfah is the start of Yahuah's Qadosh year?

- Ex 12:1 And יהוה [Yahuah] spoke to Mosheh and to Aharon in the land of Mitsrayim, saying,
- Ex 12:2 This month is the beginning of months for you, it is the first month of the year for you.
- Ex 13:4 Today you are going out, in the month Abib.

### ABIB [H24] - The GREENING

Strong's H24 abiyb; from an unused root

- 1. (meaning to be tender) green, i.e. a young ear of grain;
- 2. The name of the month of Abib or Nisan: KJV Abib, ear, green ears of corn (not maize).
- Brown Driver Brigg's also adds: month of exodus and Passover (March or April.)

Yahuah gave Mosheh the descriptive word - Abib - for the first month of the year by reason of the greening of the agricultural produce. It is this time of the year that the tequfah terminates and consequently resets the start of the year.

#### MORE SCRIPTURAL SUPPORT FOR - TEQUEAH??

Yes, we have more support! Yahuah would not let us down! ©

We are going to look at another word connected to **tequfah**.

The word is – **teshuva**.

Brown Driver Brigg's H8666

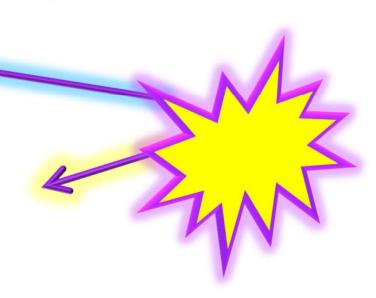

a recurrence, an answer, return

1a return

1b completion of a year, return of a year

2 at the return (construct)2a answer, reply

For a <u>celestial</u> identity to "teshuva," this means to travel one direction for a time, and then make a full 180 degree change of direction returning to the original location.

We will look at some of the verses where — **teshuva** — is used. There are other places also but not in this context of **time**. Another context this word is used in, is when a person turns their life around and returns to **Yahusha**. When they stop their futile life of this world and turn 180 degrees and begin to build a life with **Yahusha**, they have teshuva in their life. They have turned around and are going an opposite direction, returning to their Creator. **Hallelu-Yah!** 

But we are not searching that topic. Today for the word **teshuva** we will look into the **"time"** aspect.

2 Sam 11:1 And it came to be at the *turn of the year* [**teshuva**], at the time sovereigns go out *to battle*, that Dawid sent Yo'ab and his servants with him, and all Yisra'ĕl, and they destroyed the children of Ammon and besieged Rabbah. But Dawid remained at Yerushalayim.

- 1 Ki 20:22 And the prophet came to the sovereign of Yisra'ĕl and said to him, "Go, strengthen yourself. And know and see what you should do, for at *the turn of the year* [teshuva] the sovereign of Aram is coming up against you."
- 1 Ki 20:26 And it came to be, at the *turn of the year* [teshuva], that Ben-Hadad mustered the Arameans and went up to Aphĕq to fight against Yisra'ĕl.
- 1 Ch 20:1 And it came to be at the *turn of the year* [teshuva], at the time sovereigns go out to battle, that Yo'ab led out the power of the army and destroyed the land of the children of Ammon, and came and besieged Rabbah. But Dawid remained at Yerushalayim. And Yo'ab smote Rabbah and overthrew it.

2 Ch 36:10 And at the *turn of the year* [teshuva] Sovereign Nebukadnetstsar sent and brought him to Babel, with the valuable utensils from the House of יהוה, and made Tsidqiyahu, Yehoyaqim's brother, sovereign over Yehudah and Yerushalayim.

You may have noticed the blue highlighted words above. Why? Let's look once more at the verse below containing the word **tequfah** which was only lightly touched upon earlier.

2 Ch 24:23 And it came to be, at the *turn of the year* [תקופה – tequfah], that the army of Aram came up against him. And they came into Yehudah and Yerushalayim, and destroyed all the rulers of the people from among the people, and sent all their spoil to the sovereign of Darmeseq.

# BREAK! WHAT??? - ARE YOU SAYING THAT TEQUIFAH AND TESHUVA MEAN THE SAME THING???

#### No, it's not quite like that! ©

**Tequfah** - very specifically references - the actual celestial event.

Does that mean the timing of the equinox here?

Yes, tequfah identifies the actual equinox and the positioning of the sun in the Mazzaroth.

**Teshuva** references/describes very basically <u>the type of action within</u> the celestial event ... which Scripture uses to point accurately to the spring time of the year.

Does that mean the first day of spring here?

**Teshuva** is not actually the first day of spring but very close to it — say, <u>early</u> springtime.

The difference is similar to saying - Richard's 68 Mustang Shelby GT 500 KR - (tequfah.)

Or optionally, just saying - Richard's car - compare to - (teshuva.)

Both are speaking of the same object (when the context is <u>time</u>) — it is just that "tequfah" is **MUCH** more specific and highly accurate.

Hopefully we understand the similarity of meanings and concepts between the word **tequfah** and **teshuva** a little better.

We can now compare all the verses and know very assuredly that the time for kings to go out to war is in the spring time, after the winter has passed.

Spring time! **Tequfah!** The Greening of Abib! Passover and Unleavened Bread!

Now when we read about the **tequfah** completing its circuit in the Mazzaroth and we read about that being the end of the year, we can be very certain that **Yahuah** clearly gave us a **super definitive event** to proclaim the end of the year. Where is it?

In the shamayim (the heavens)! Yes, **Yahuah** has declared the end of His Qodesh Festival **Covenant Calendar** as the - tequfah. This is clearly seen in Genesis 1.

Gen 1:14 And Elohim said, "Let **lights** come to be in the expanse of the heavens to separate the day from the night, **and let them be FOR SIGNS** and **appointed times**, and for <u>days</u> and <u>years</u>."

Question: What "lights" are being referenced here?

- The Hebrew words Tequfah and Teshuva are defining a point in time when the realization of a point of direction change is recognized.
- Yahuah has determined that precisely on the spring Tequfah (Abib greening), is the point upon which His Qadosh (Set-Apart) Mo-edim (Feasts and Festivals) year terminates and restarts.
- Yahuah instructed Mosheh of this particular point in Exodus 12:1,2/13:4.
- · RE-CAP:

#### the <u>4 CELESTIAL IDENTITIES</u> that culminate to form a Tequfah are –

- 1 Mazzaroth Constellations (Stars)
- 2 Light emitted from the Sun which facilitates a shadow
- 3 Sum (the orb itself declares accurate positioning)
- 4 Earth (a vantage point for measuring purposes)

# QUESTION:

Have you observed any information here pertaining

to THE MOON?

Is there any place where Yahuah gave instruction to Mosheh to observe the moon to determine the start of the year?

## Taking "ourselves" to Task!

Next we will examine a "tequfah chart" for 2014. Will you be able to notice a **mistake** on this chart – due to the increase of new information and knowledge since that time?

**Hint:** A Light Season must be part of the equation to observe the celestial **tequfah SIGN** event.

**Task:** It must be determined if the tequfah occurred within that 24 hour period.

Then and only then can the end of the year be proclaimed!

Does that shadow alter itself or not?

I praise **Yahuah** that His mercy endureth forever. He holds our hand even when we are stumbling; picks us up guiding us on our journey!

#### Where do we observe the Tequfah Sign on this chart?

#### **Year: 2014** When is the New Year?

Tegufah (equinox) March 20 2014 16:57 Universal Time clock or 10:57 MDT Calgary Alberta Canada.

March 2014 (31 Gregorian days) [New moon Mar 1 & 30, 2014.] **Problem Areas! Vernal Equinox New Moon Next New Moon** 15 10 Tegufah: YEARS END by Scripture and Hebrew definition 10 interim days of waiting until crescent moon sighting

Pleas

f the crescent moon

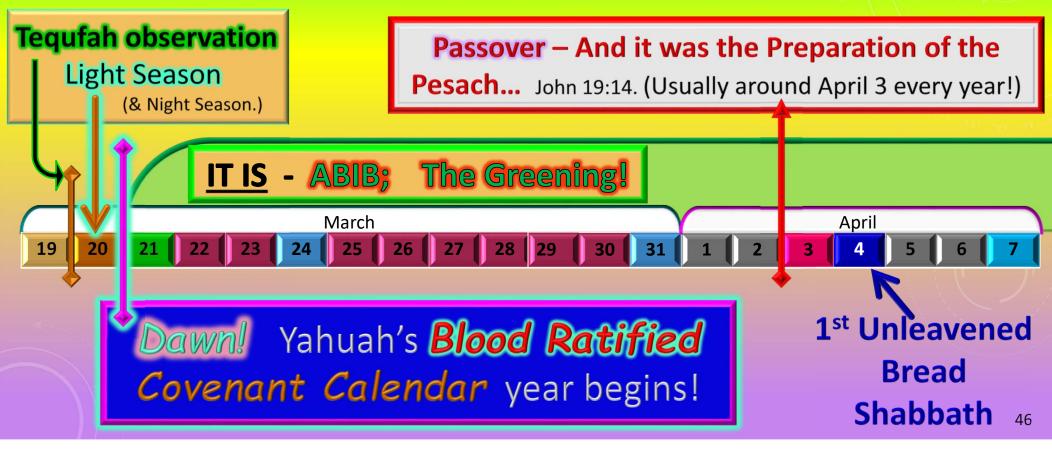

Praise Yahuah for His patience with those of us who are slow to learn, and make mistakes.

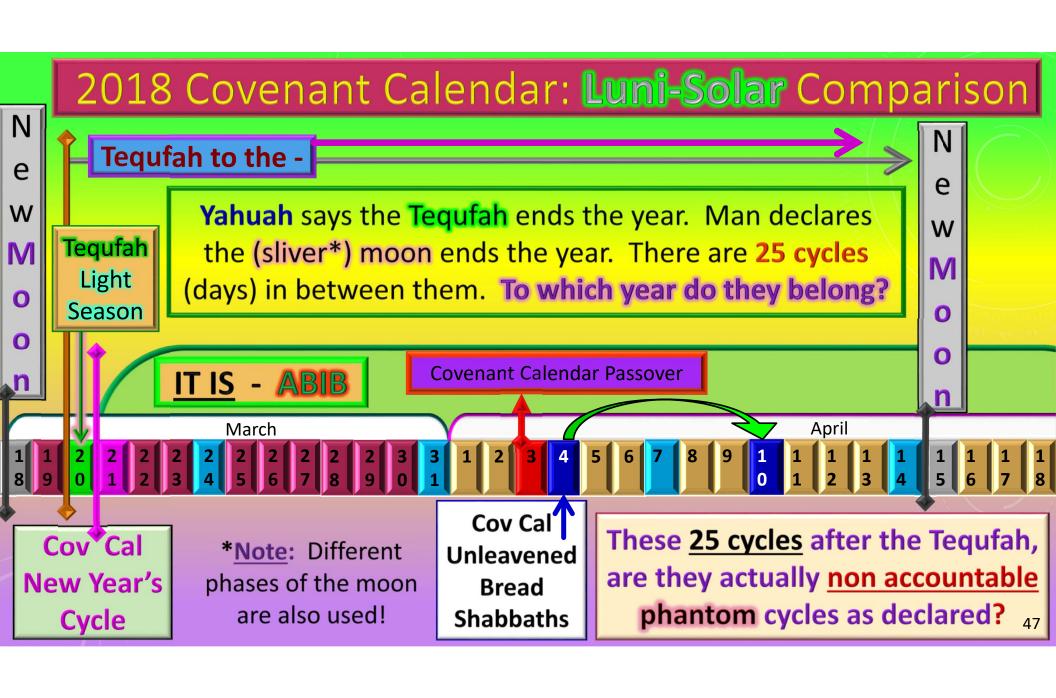

Let Me instruct you and teach you in the Way you should go; Let Me counsel you, My eye be upon you.

#### Passover 2018 Covenant Calendar Calculations

Mar 20, 10:15 AM MDT, the Tequfah is determined - Shadow sign is noted - the next 24 hour cycle begins the New Year.

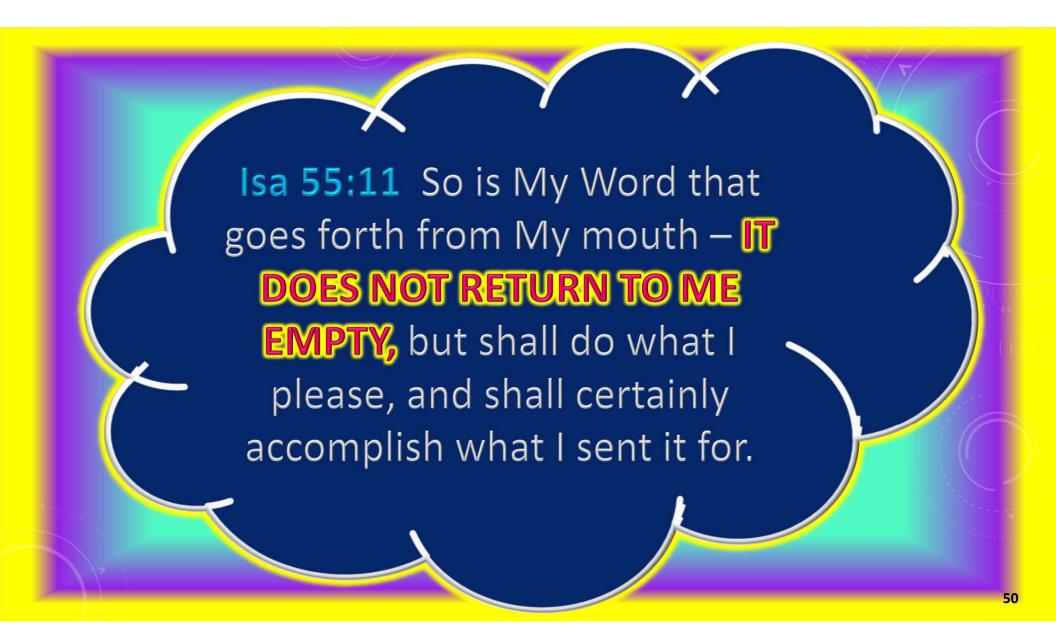

The Luni/Solar calendar declares these days between the tequfah and the new moon as being non counted days.

Yet Yahuah held me accountable for my sins on these same days!

How can there be a double standard which conflicts with Yahuah's

Word, and yet carries the consequence of death?

#### Question:

Has anyone told you that those interim cycles between the tequfah and the "new moon" are not to be accounted for??

Would this mean that Yahuah created a VOID?? 25 "VOIDS" THIS YEAR ALONE???

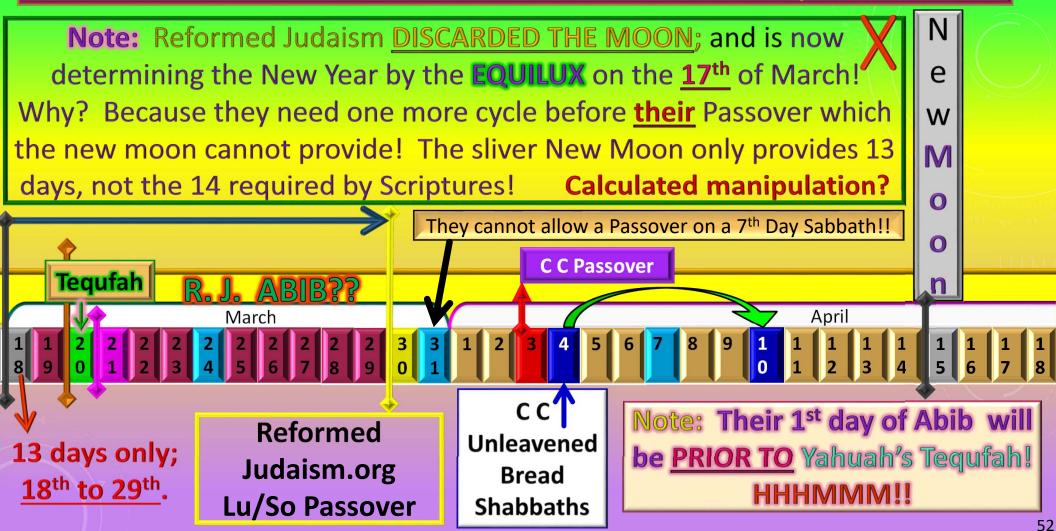

Has your Creator made anything that does not exist nor can be accounted for?

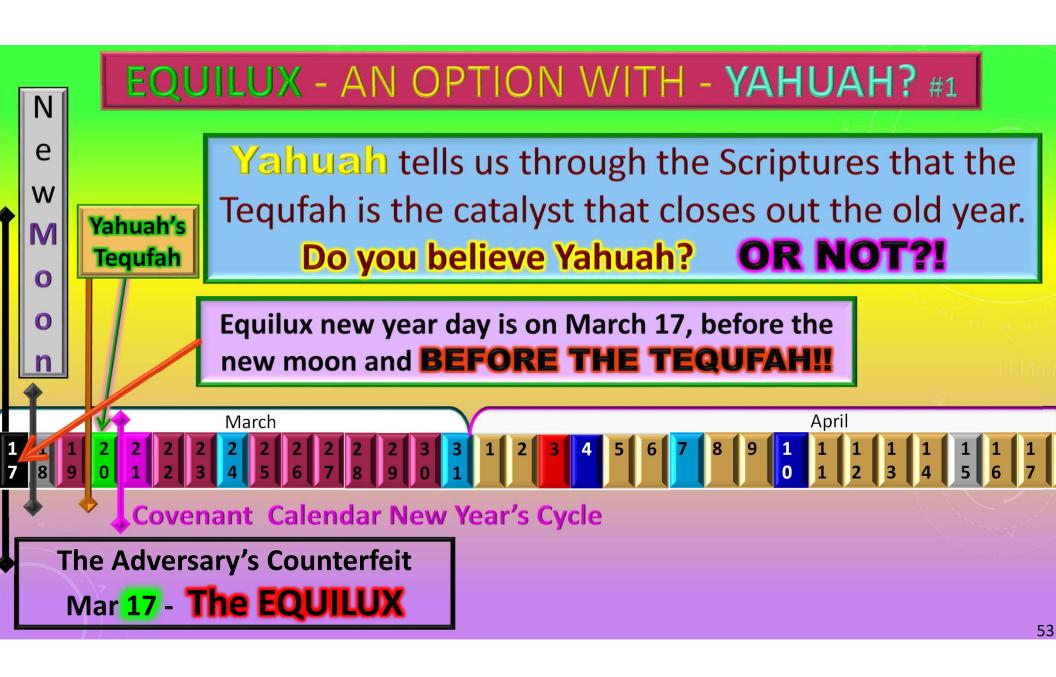

Friends the time has come to reassess our belief structure on the start of the year topic.

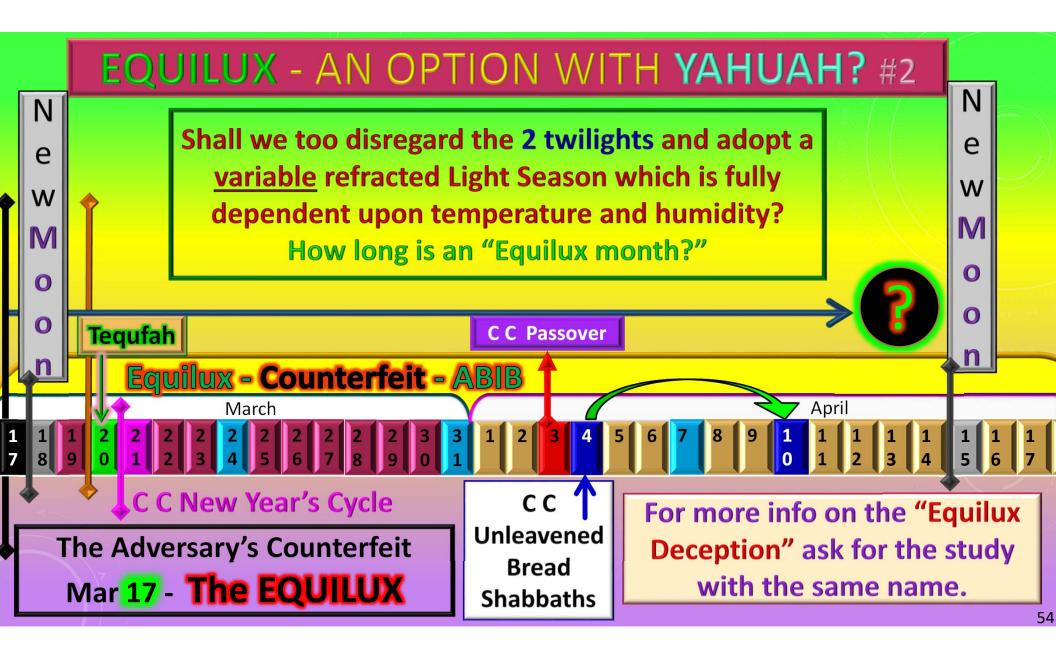

Next slide is another idea to put forth that might disturb you a little. OK! <u>A LOT!</u>

It identifies **HA SATAN'S COUNTERFEIT** FOR THE TEQUEAH! 51

#### 2018 Covenant Cal – Counterfeit Comparison #1

### "NEW MOON" — IS IT AUTHENTIC?

If a person researches into <u>THE HEBREW TEXT</u>, the words – "new moon," as found in our present received text Scriptures, <u>CANNOT BE FOUND</u>.

The words "new moon," promoting allegiance given to the moon, simply do not exist in the original Hebrew script.

The words "NEW MOON" have been infused into our modern Scriptures.

The Masoretic rabbis saturated their belief patterns into their version of the Scriptures which is where we get our many editions of the Scriptures today.

If you are serious about study and want to follow the Lamb whithersoever He goeth, the time has come for you to investigate this malicious deception. All it takes is a desire to study for truth. The information is readily available to you for the asking.

# SUMMARY ACCORDING TO YAHUAH'S SCRIPTURES

- The Spring Tequfah is the celestial point upon which Yahuah's Qadosh (Set-Apart) Mo-edim (Feast and Festival) times begin and terminate.
- The Tequfah's are formed by 4 celestial identities which prevents worship of any one of Yahuah's creation. Coincidence?
   No, it was formed by INTELLIGENT DESIGN!
- The four celestial identities which form the Tequfah's are Mazzaroth (stars), Light Rays (from the sun), Sun and the Earth.
- The 24 hour cycle after the Tequfah, the first cycle of Abib (greening spring), is the point upon which the 14 cycle count to Passover begins.

# HOW DOES ONE DETERMINE THE NEW YEAR'S DAY ONCE THE **TEQUEAH** HAS BEEN OBSERVED?

- If one acknowledges the tequfah determined by NASA which is reduced down to actual minutes, then the timing of this system must be adjusted to Yahuah's Covenant Calendar format because of the Dawn start.
- The Gregorian format does not align with Yahuah's Covenant Calendar.

  The Covenant Calendar is very thoroughly documented within the Scriptures.
- **Example:** NASA declares a tequfah to occur at 3:30 AM, March 20.
- Question: What cycle of the month does this equate to on Yahuah's Covenant Calendar format?

# ADJUSTING HUMAN DETERMINATION OVER TO YAHUAH'S COVENANT CALENDAR

- NASA Tequfah 3:30 AM March 20. (3:30 is still in night darkness!)
   NASA uses Roman Reckoning to determine the 24 hour cycle.
   This means the new 24 hour cycle begins at midnight.
  - Yahuah's 24 hour cycles of the week, start at Dawn! (NOT SUNRISE!)
    There are 36+ accounts of this in the Scriptures!
  - This means that under NASA's system for determining time, March 20 has started at midnight, approximately 6 hours before Dawn's first light on **Yahuah's** eternal time piece, the Mazzaroth.

- Therefore when NASA has declared the tequfah to occur on March 20 at 3:30 AM, the tequfah actually occurred at 3:30 AM on March 19 when converted over to Covenant Calendar time!
- Why March 19<sup>th</sup>? Because the first light of Dawn, PRIOR TO THE SUNRISE, has not occurred. The Dawn event facilitates changing the date from the 19<sup>th</sup> to the 20<sup>th</sup> of March!
- When calculating the first cycle (day) of the year, this factor becomes ultra important.
- IF the tequfah is declared by NASA to occur in the ereb (twilight mixture) after sunset, or any time up to midnight (a default), then the date declared by NASA will not need date adjustment to be in alignment with Yahuah's Covenant Calendar.

#### Step #2 -

- As we well know, the name March is not recognized in the Scriptures. March has human origins and it also must be converted to proper Scriptural terms.
- Time in the last month before the tequfah is simply the 12<sup>th</sup> month.
- The first month of the year, after the tequfah, according to the Scriptures is given the descriptive word Abib. The meaning of Abib is the greening.
   This is a description of what is occurring at this time.
- For Scriptural references on Abib please see –
   Ex 13:4/ 23:15/ 34:18 & Deut 16:1.
- Yes we also frequently see the name <u>Nissan</u> given to the 1<sup>st</sup> month but this is not seen in, nor recognized by the Scriptures! (Enough said.)

#### Step #3 –

- When the visible shadow briefly withdraws, or it strikes a perfectly straight line (depending upon which type of sundial is used), that specific cycle is then determined as the <u>TEQUFAH SIGN</u> cycle (or day).
- This cycle of <u>no shadow of turning</u> (see James 1:17) is the final cycle (day) of Yahuah's Covenant Calendar year.
- Following the "cycle of no shadow of turning," after the eyelashes of Dawn's light (Job 3:9/41:18) has exposed itself above the dark horizon, this then is determined as the first cycle of Yahuah's Covenant Calendar.
- This specific cycle (day) is the first count of 14 for the Festival of Passover!

## Important Reminder Notice!

- Season (darkness) when the shadow cannot be observed, the following Light Season from Dawn to Dawn, is then considered the Light Season for observing the tequfah SIGN and is the final cycle of the year.
- The following cycle "after that" will then be –
   Yahuah's New Year cycle.

- Is it any wonder why this next verse was preserved by Yahuah?
- Psa 90:12 Make vs to knowe so our dayes, that we number them: and we wyll frame a heart [vnto] wisdome. Bishops 1568
- Psa 90:12 Teach us to number our days, And let us bring the heart to wisdom.
  The Scriptures

Can this verse be connected somehow to Luke 11:52?

Luke 11:52 "Woe to you learned in the Torah, because you took away the key of knowledge. You did not enter in yourselves, and those who were entering in you hindered."

#### REALLY UNDERSTANDING PS 90:12

"So teach us to number our days, that we may apply our hearts unto wisdom."

Counting Principle: Yahuah's original year has 360 days. When we learn to count out the days to 360, then it is time to be watching for the "shadow sign" (Gen 1:14) which will be accomplished at the 365 day mark.

This will occur within the same 24 hour period of when the equinox event actually occurred in each individual time zone.

65

- When determining the tequfah (equinox) it is important to be aware of -
  - Man's midnight change of the 24 hour cycle, in comparison to Yahuah's Dawn start to the cycle. A possible adjustment may be needed.
  - If accepting NASA's specified tequfah (equinox) determination, your personal time zone must be examined carefully; an adjustment in time and date might be required.
    - Example: Does the tequfah occur near before or after, midnight?
      - This potentially might create a date change from the Gregorian calendar!
    - Example: Does the tequfah occur <u>before or after Dawn</u>
       (NOT SUNRISE!)

This also could potentially cause a date adjustment.

- These few items, that we need to be aware of, are actually quite simple once understood.
- For the person standing outside their home, looking at the sky and setting up a simple sun dial, it is very straight forward.
- For the person wanting to determine the tequfah in advance, there is another study available named **Equinox Equation**. This is an advanced study that covers several different scenarios of tequfah timing in detail.
- The explicit purpose is to have you fully capable of determining the tequfah well in advance for your location and time zone.

#### FINAL QUESTIONS TO PONDER

- If the moon is our "guiding light," then why is it that Yahuah did not mention the moon in the Scriptures until Joseph's dream?
- Why is it that the moon was not mentioned to Mosheh for determining the year?
- Why is it that "new moon" does not exist in the Hebrew Scriptures?
- At what point in time do we find "<u>recent</u>" solid dateable historic evidence of lunar involvement in the worship of **Yahuah**? [Hint – Qumran Scrolls.]
- Where are there commands in the Scriptures to observe the lunar system for the worship of Yahuah?
- Where do we find a 13<sup>th</sup> lunar month, with a witness, written in the Scriptures?

#### FINAL COMMENTS TO PONDER

We have seen the Scriptural version to terminate the year past, and to initiate Yahuah's New Worship Year.

What we do with it will determine our future.

There are several basic systems to guide us through worship -

1. Yahuah's Set-Apart Blood Ratified Covenant Based Calendar directly linked to the MelchiTzedek Administration.

This is exposed clearly in the flood account with Noah. It is also clearly documented in the exodus from Mitsrayim (Egypt) and the Passion Week of Yahusha.

#### OTHER WORSHIP SYSTEM CHOICES

2. The Zadok and Enoch Calendars which are based upon the Dead Sea (Qumran) Scrolls. These calendars place the Dead Sea Scroll information above that of the Inspired Word of Yahuah.

The dates and Appointed Times from the Enoch and Zadok calendars cannot find alignment with the documented words of the Scriptures. It simply does not exist.

To examine this closely ask for David's Qodesh Lechem and the 2 different studies on Joshua's Passover in Canaan.

#### OTHER WORSHIP SYSTEM OPTIONS

3. The lunar based systems of worship face seriously founded accusations leveled against the words - "new moon." What you do with this information will determine what schedule you worship your Creator on. Zeba and Zalmunna, were slain by Gideon upon command from Yahuah (Judges 7:9 - 8:21). They were kings of moon worshipping people. Jericho was also the center of moon worship and was the first identity destroyed by Yahuah upon Yisra'el entering the promised land.

Revelation 12:1 shows the Bride of Yahusha (Bethula of the Mazzaroth) as having placed the lunar system of worship symbolized by the moon, UNDER HER FEET! This position exposes complete vanguished authority in utter defeat.\*

#### MORE ON THE LUNAR OPTION

The Metonic Cycle (the lunar/solar calendar which surfaced shortly after the sun dial incident of Hezekiah) is promoted heavily today among Feast observant people.

The Dragon is not foolish enough to again promote a full lunar calendar, but he has most definitely promoted a combined lunar and solar calendar.

#### IS THIS NOT ...

Some very interesting material with very heavy questions accompanied with some equally heavy comments?!

May Yahuah bless and guide you through eternity.

THE END

#### Next Study: April 27/18
